## Software Developer

Jakarta, Indonesia | +6285804424680 | [dhronzae@gmail.com](mailto:dhronzae@gmail.com) | [LinkedIn](#) | [Github/Portfolio](#)

### SUMMARY

I'm an IT enthusiast with a passion for programming, particularly in web development and mobile applications. I hold a Bachelor's degree in Information Technology from Brawijaya University. During my studies, I gained practical experience working part-time as an IT Support for approximately two years. After graduating, I briefly worked as an Assistant Drafter for about eight months.

Driven by my desire to pursue a career in the IT field, I decided to enhance my skills by enrolling in the Hacktiv8 bootcamp, where I completed the full-stack web development program. This experience solidified my foundation in both front-end and back-end development, preparing me to build robust and scalable applications.

### EDUCATION

#### Hacktiv8

Full Stack JavaScript Immersive Program ([Transcript](#))

Jakarta, Indonesia

February 2025 – June 2025

#### Brawijaya University

Bachelor of Information Technology (GPA 3.30/4.00)

Malang, Indonesia

2018 – 2024

### WORK EXPERIENCE

#### PT. Melia Karya Gemilang

IT General

Malang, Indonesia

June 2022 – May 2024

- Handled customers network supports
- IT supports for customers needs

### SKILLS

**Language:** JavaScript, Python, PHP, Java, C++

**Front End:** Next Js, React, Redux, React Native, Bootstrap, Tailwind CSS, HTML & CSS

**Back End:** Node JS, Express, MongoDB, Redis, GraphQL, Socket.io, Sequelize, PostgreSQL, MySQL, Rest API, JWT, OAuth, AWS, CI/CD

**Soft Skills:** Git & Version Control (Github), Agile & Scrum, Clean Code, Security Best Practices (Cors & CSRF)

**Internet of Things:** Arduino IDE, Embedded Systems Engineering, Basic Electronics

### PROJECTS

#### [Fallaraven](#)

May 2025

Fallaraven is a modern e-commerce web application inspired by outdoor apparel brands that offers a seamless shopping experience. Built with Next.js, TypeScript, and MongoDB, the platform features product browsing with infinite scroll, search functionality, secure user authentication, and wishlist management. The application employs a hybrid rendering approach with server-side rendering for SEO-critical pages and client-side rendering for dynamic components, all wrapped in a fully responsive design that works across all device sizes.

*Tech stack: Frontend (Next.js, React, TypeScript, Tailwind CSS, DaisyUI), Backend (Next.js API Routes, MongoDB), Authentication (JWT, bcryptjs), Data Validation (Zod)*

#### [KonekIn](#)

May 2025

KonekIn is a professional social networking mobile application built with React Native and Expo that connects professionals for seamless content sharing and networking. The platform features secure user authentication, an interactive content feed, social engagement tools (likes and comments), and comprehensive user profile management with follower/following relationships.

*Tech stack: Frontend (React Native, Expo, Apollo Client, React Navigation), Backend (Apollo Server, GraphQL, MongoDB, Redis, JWT)*

### [Kaboom!](#)

May 2025

This is an engaging web-based real-time multiplayer quiz game application with an intuitive user interface, AI-powered question generation, and a competitive gaming experience. The application features proper authentication mechanisms, interactive gameplay with real-time updates, sound effects, and a persistent leaderboard system.

*Tech stack: Backend (Express.js, Socket.IO, Google Gemini AI API), Frontend: (React.js, Socket.IO Client, TailwindCSS/DaisyUI, HTML & CSS)*

### [Cocoding](#)

May 2025

This project is a full-stack web-based news portal application that features a well-structured database schema implemented using ORM, proper authentication/authorization mechanisms, and a responsive frontend interface. The application allows users to browse courses, register/login with Google auth, and checkout courses with Midtrans third party API.

*Tech stack: Backend (Express.js, Sequelize, PostgreSQL, JWT), Frontend (React.js, React-router, React-redux, React-scroll-parallax, framer-motion, Tailwind CSS & DaisyUI, Google auth API, Midtrans API)*

### [Menit Dot Com](#)

April 2025

Web based news portal application with well-structured database schema using ORM, and proper authentication/authorization mechanisms, and can be run with a proper frontend. The application allows users to browse news articles, register accounts, and access personalized content based on their authorization level.

*Tech stack: Backend (Express.js, Sequelize, PostgreSQL, JWT), Frontend (React.js, Bootstrap, HTML & CSS)*

### [Cocoding \(beta/ejs\)](#)

April 2025

Web based edu-tech app with the integration of an ORM environment.

*Tech stack: Express.js, Sequelize, PostgreSQL, HTML & CSS, Bootstrap*

### [Cars Buddy](#)

March 2025

A simple web based app for cars showroom

*Tech stack: HTML & CSS, Bootstrap, Document Object Model (DOM)*

### [PELATO](#)

May 2024

IoT system that is useful for automatic land irrigation in urban communities

*Tech stack: Arduino IDE, Basic Electronics, Chatbot Telegram*
